SENIOR SOFTWARE ENGINEER

Holiday Extras Dec 2015 - Feb 2017

Responsibilities

Produce bug free, future proofed code, setting the standard by which others developers work. Translate the needs of the business into solutions. Working to and on the company values, the team standards and best practices.

Identify, react quickly and take ownership of any serious problems with quality. Improve the performance and development of the team. Sharing and supporting individuals by helping create team processes, following them and enforcing their use by others. Identify technical potential in others and works with them to improve the finer detail. Constantly look for better ways of working and ways to improve.

Skills & Technologies

JavaScript, React, Backbone, Redux, Ruby, Rails, AWS, GIT, TDD/BDD, CoffeeScript, jQuery, Less/CSS, Scrum, Pods, User Experience, Product Design, Code Review, Jira, Slack, Pair Programming

CTO & TECHNICAL COFOUNDER

Trakio Apr 2013 - Dec 2015

Responsibilities & Achievements

I've spent the last two and a half years working on Trakio, helping companies increase activation and reduce churn by understanding their users better. In that time we have executed a number of pivots searching for a repeatable and scalable business model. Each time creating hypotheses and testing them.

As the lead engineer I have been responsible for building, managing and documenting several production services and client libraries from scratch. I implemented the provisioning of our hardware infrastructure on AWS using Chef, along with service monitoring and redundancy, having had no previous experience of SysAdmin. I recruited and managed all our technical employees and contractors, managing their on boarding, training, and providing direction and mentorship for their personal development. Utilizing online tools to collaborate remotely, often across timezones.

Skills & Technologies

Ruby, Rails, Sinatra, Sneakers, OAuth, MongoDB, WebSockets, RabbitMQ, Redundancy, HAProxy, Nginx, Monit, Capistrano, Chef, AWS, GIT, TDD/BDD, JavaScript, CoffeeScript, D3, Load Testing, Highcharts, jQuery, Less/CSS, Photoshop, Application Design, User Experience, Product Design, Infrastructure Design, Technical Support, Code Review, Trello, Slack, Pair Programming

CTO & TECHNICAL COFOUNDER

Virally Jun 2012 - Apr 2013

Responsibilities & Achievements

I conceived and delivered a working prototype as a proof of concept inside of two weeks. I led and managed the team that then fleshed this concept into an off the shelf solution to generate and manage leads from long form content marketing. The product we built enabled customers to achieve conversion rate increases of 122-200%, and secured us a 6 month up front contract with GFK. Both myself and my cofounder sold our stakes to pursue other ideas.

Skills & Technologies

Ruby, Rails, JavaScript, jQuery, Less/CSS, PostgreSQL, Heroku, CDN, GIT, Social Auth, TDD/BDD, Product Design, Lean Startup, Trello

Example Code

Some of my open source work:

Trakio Ruby Client

A Ruby Gem for Trakio's API.
github.com/msaspence/trakio-ruby

Trakio JavaScript Client

A JavaScript client for Trakio's API.
github.com/msaspence/trak.io.js

Flickr Feed

A Demonstration of a React App, consuming Flickr's API
github.com/msaspence/flickrfeed
flickrfeed.msaspence.com

ActivatedUI Gem

A Ruby Gem for managing the state of HTML based interfaces.
github.com/msaspence/activated_ui

This Website

Aside from the content and some snazzy responsive design, there are some jekyll plugins to allow for HAML, Less and live reload.
github.com/msaspence/msaspence.com

Technical Skills

Product Design, Project Management, UX

JavaScript, React, Redux, Less, CSS

Ruby, Rails, Sinatra

MongoDB, PostgreSQL, RabbitMQ

Photoshop, Design

Chef, Capistrano, DevOps, HAProxy

C#, Go

SENIOR CONSULTANT & LEAD DEVELOPER**Fruitbowl Media** Mar 2012 - Aug 2012**Responsibilities & Achievements**

I increased the size and breadth of the company's portfolio by adding more advanced web application work. I built a team capable of delivering this more complex work by recruiting an additional designer and developer, and facilitating the training existing staff.

Skills & Technologies

PHP, Wordpress, HAML/HTML, JavaScript, jQuery, CSS/Less, Photoshop, MySQL, PostgreSQL, TDD/BDD, GIT, Account Management, Project Management, Trello

WEB DEVELOPER**University of Kent - Web Development Team**

Nov 2007 - Mar 2012

**Responsibilities & Achievements**

I built and maintained several key systems including the University's password reset system, on boarding for new students and online maps. I successfully managed the implementation and launch of the University's student fee gateway by a 3rd party vendor, a service that processes tens of millions of pounds in tuition each year. I oversaw the transition of the main marketing site's web framework, a key component of the University's web presence, to this team. I led the adoption of agile processes, working to refine a scrum based process that allowed us to be an agile team within a slow and bureaucratic department. I implemented and consulted on several user experience improvements across various teams and services which contributed to a raise in our student satisfaction rating, the key performance metric for our department.

Skills & Technologies

Apache, PHP, Symfony, Drupal, MySQL, HTML, XML, XSLT, CSS, JavaScript, jQuery, Photoshop, Wireframing, Application Design, User Experience, User Testing, Load Testing, TDD/BDD, Agile, Scrum, Sharepoint, Project Management

UNIVERSITY OF KENT**Multimedia Design & Tech BSc** Sept 2004 - July 2007**ROYAL HOSPITAL SCHOOL****GCSEs & A Levels (UK High School)** Sept 1997 - July 2004

A Levels: Business, Physics, Maths, Politics **GCSEs:** English Literature, English Language, Maths, Double Science, Geography, History, Maths, French

Other Interests

I understand the importance of a balanced lifestyle, and have many interests beyond software development, here are a few:

Learning Spanish

My girl friend is Mexican American and as part of an effort to learn about her heritage and culture I am learning Spanish. Apparently I need to be fluent before we have children!

Keeping Fit

Last year I hit my target of a combined 1000lbs total across, bench press, dead lift and back squat. I'm now working towards rowing a marathon.

Lacrosse

I'm a casual lacrosse player to say the least, but for what I need: some where to blow off some steam and relax, it is perfect.

Snow sports

I'm a proficient skier and a distinctly average boarder, I try to get a week on the snow in at least once a year.
